

## How the On-Road Trial works

Data from up to 100 operators and over 1000 vehicles Australia wide

**Data collected using telematics**

WEIGHT

FUEL

DISTANCE/  
LOCATION

**Data analysed**

Measures road use data based on distance, weight and location

**Mock comparison invoice generated**

Compares fuel and registration charges with potential direct road user charges.

### Benefits to participants

- Participants receive data on their fleet
- No cost to participants
- Telematics devices or hubodometers installed and maintained for the life of the trial
- Your opportunity to help shape the future of heavy vehicle charging

Personal and identifying information is removed

**Mock comparison invoice provided to participant**

**Data used to create report and recommendations**

**Get involved!**

Express your interest to participate in the National Pilot's On-Road Trial. Contact your industry peak body or get in touch with the National Pilot team.
